

How To Order:

- **Select kit size larger than your measurements.** The 82" height kits cut to fit 6'8" high doors.
- Select color: white (W), almond (AL), brown (BR) frame.
- Example: for a brown 36" x 81" door you order SP-3882 "BR" for side pull or PD-3683 "BR" for pull down operating style.
- Phiffer® Charcoal mesh is standard on all units.
- Inside/inset or outside/surface mounting hardware included.
- One-Size-Fits-All means screen will cut down to any size smaller than kit size selected.

Dual Cassette & French Doors*:

Requires two kits that meet in the middle. Order two kits at the same size and indicate that they are for double doors.

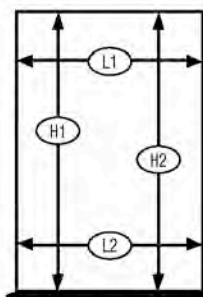

You must order a stationary lock set to allow for one door to operate and one to be locked open.

Measure for Inset Mounting:

Measure both left and right sides (H1, H2) and top and bottom (L1, L2). Smallest H and L determines kit size.

Measure For Surface Mounting:

Measure both left and right sides (H1, H2) and top and bottom (L1, L2). Add 3" to length and 3" to height to determine kit size.

Measuring Diagram

We Custom Cut At No Charge

Custom "cut-to-size" at factory. We are not responsible for any errors due to improper measurements provided by customers. We are not responsible for wrong sizes.

Custom cut orders are not returnable.

* For Double Door/French Doors, you must order two kits of the same size.
