

### How To Order:

- Select kit size larger than your measurements. The 82" height kits cut to fit 6'8" high doors.
- Select color: white (W), almond (AL), brown (BR) frame.
- Example: for a brown 36" x 81" door you order SP-3882 "BR" for side pull or PD-3683 "BR" for pull down operating style.
- Phiffer® Charcoal mesh is standard on all units.
- Inside/inset or outside/surface mounting hardware included.
- One-Size-Fits-All means screen will cut down to any size smaller than kit size selected.

### Dual Cassette & French Doors\*\*:

Requires two kits that meet in the middle. Order two kits at the same size and indicate that they are for double doors.

You must order a stationary lock set to allow for one door to operate and one to be locked open.

### Extra Wide for Patios & Garages:

Available in 8' or 9' kits. For openings up to 16' - 18' wide, you will be sent two kits of the same size. Uses a removable dual-track (back-to-back) center pole with floor slide bolt (stationary lock). A 1/2" hole must be drilled in the floor.

### Measure for Inset Mounting:

Measure both left and right sides (H1, H2) and top and bottom (L1, L2). Smallest H and L determines kit size.

### Measure For Surface Mounting:

Measure both left and right sides (H1, H2) and top and bottom (L1, L2). Add 3" to length and 3" to height to determine kit size.

### Extreme Screens for Patios & Garages:

For openings up to 20' wide, 12' high. Available for insect and SunShade screens. Requires professional contractor installation. Call for an estimate.
